## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 to 17, drawn to an assembly, classified in class 257, subclass 782.
- II. Claims 18 to 24, drawn to a process for attaching an integrated circuit device to a substrate, classified in class 438, subclass 15+.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case instead of applying heat step occurring simultaneous with the positioning step, it can be preformed afterwards.
